| SYSTEM NO. | **SSXHO293** |
|---|---|

| VEHICLES | YEARS |
|---|---|
| HONDA CIVIC TYPE R FL5 | 2022 ONWARD |
| ACURA INTEGRA TYPE S (DE5) | 2023 ONWARD |

| NOTES | Valve control with remote operation for Milltek and OEsystems |
|---|---|

1. 
   Remove the boot liner to reveal the grommet required, this is where the module will be stored.
2. Run the cable through the grommet and down to the valve.
3. 
   Plug the OE cable into the Milltek loom, and then the Milltek loom into the valve motor. Ensure the cable is tied up neatly and away from any possible heat source. The product is now ready to use.
